

# **MidasMethod<sup>2.0</sup>**

**NOTHING BUT PURE GOLD.**

## Getting Started

First of all you will need to have accounts with at least [Betfair](#) and [WilliamHill](#). So ensure you have an account at both to get the best odds and get the most out of the Midas Method.

For the latest free bet offers please visit the page below:

[http://themidasmethod.net/free\\_bets.html](http://themidasmethod.net/free_bets.html)

If you are from the USA, you can still use the system and we would recommend you bet at [Twinspires](#), as you can bet legally on selected UK racing here.

## Introduction

Before we get started, I'd just like to take this short moment to thank you for investing in The Midas Method. As the author of this betting strategy it is my only hope that you too will use the methods outlined in the PDF report to their full potential.

As you're probably well aware, this is a short but straight-to-the-point PDF report. I could have expanded this out with chunks of irrelevant information but I felt it important to give you this system as is. No fluff, no filler. Just a good solid betting system that gets straight into the 'meat' of the strategy without any distractions.

I'm extremely confident that you'll experience a great deal of success if you follow these strategies. However a pattern I see is that many people will go out of their way to invest in betting systems but rarely take the action to put them into good use.

My advice to you would be to start off small and begin slowly until you've gained complete confidence in this system, then from there it's really just a matter of scaling it up to harness it's full power.

But like any kind of gambling or betting, I ask you to gamble responsibly and to make smart, informed decisions when using the strategies outlined in the report. Never play with money you can't afford to lose. I cannot take responsibility for future results or the selection method being used on your

With that said, I wish you all the best with this method. Now, let's get started.

## Let's get into it!

The following methods are the real deal! They'll have losing days, but a day or two later up pop 2 or 3 winners at 8/1+ and it's BANG back into form again. I've followed these roughly for around 3 years.

I'm certain that the following information will put a lot of money in your account over the coming months and years and a smile on your face with your profits. Enjoy.

As you've probably guessed from the initial description of the systems, you'll be following information **as it becomes available during racing**. The systems utilize obvious information that's available for anyone to see, but we choose to use only the information that is relevant and proven to point to a large majority of very fancied horses that are in the race to win.

**Aren't ALL horses in a race trying to win?** Fortunately for us, ***no they're not***. It's estimated that in any given race, a minimum 20% of the horses are running with *absolutely no intention of trying to win*. They're NOT running to their true ability. Shrewd connections are running them at an unsuitable distance, the wrong going or surface and are "laying them out" for a gamble for a certain race that can be months away.

20%+ of all the horses running each day adds up to a **LOT of gambles that are happening daily in the UK**. Now we can spot over 90% of these horses and back them accordingly.

If you're wondering just how good some "inside information" is, I was privileged to have access to information from someone with mass influence however I'm not exactly compelled to say who that was.

Anyhow, out of 20 horses I was given, **18 won at prices no shorter than 8/1**. Most were in the **12/1 to 16/1 price range**. Very powerful information indeed...

But unfortunately this person was found out to be giving his tips out to too many "friends" and the information effectively stopped coming.

Real "inside information" like the above is only available for the privileged few and is **never advertised**. But money has to be backed on these horses and a large enough percentage of that money ends up getting placed, shortening the prices for us to spot and to take advantage of.

I'll explain in detail shortly how to differentiate between the real and false gambles. "Gambled on" horses win almost every day, the key to success is knowing which shortening prices are real inside info with a great chance of winning or getting placed - and which are false "also ran's". Once you know

the difference, which you will in a moment, you can basically scale it up and make as much money as you want!

The following shows only a handful of losing days over a month on average and the vast majority of the time makes **very good profits daily**.

**There's two versions:** One to follow during racing, and; the other where you can spend roughly 15 minutes each day spotting decent selections to be backed to win and to place on Betfair. Obviously following the racing will produce ***much more*** selections and more profits.

## Live Racing Version:

Basically we're backing horses that open in price on the 'Sportinglife.co.uk live shows' at a much reduced price from their betting forecast price in the Racingpost. *(don't use any other price comparison sites or betting forecast sources. RacingPost betting forecasts shown at the bottom of each race card and the Sportinglife.co.uk opening shows from the link below)*

Anything with over a 40% reduction in price from the Racingpost betting forecast to the opening shows (the 1st price they show around 10 minutes before the race) on sportinglife live shows: <http://www.sportinglife.com/racing/live-shows>

There are winners at 14/1 and lots of places at 8/1 etc, but the ones heading the market opening on Sportinglife live show odds/prices as the favourite or 2nd favourite have a **very good winning strike rate**.

**Even if they're forecast as favourite but a good 40%+ shorter in price in their opening shows indicates a very decent strong running favourite!**

## **“Sticking Out” Banker Bets:**

Horses that open with a good 50%+ drop which are say 6/1 to 12/1 in the forecast, dropped from 4th or 5th in the Racingpost betting forecast that

open as the favourite on the Sportinglife live shows stay the favourite.

If you wait for just these banker bets above then you can expect around an

**80% strike rate of them being placed and around a 45% to 50% of them**

**winning!**

Just following the above to say £200 for a place and £100 for a win will produce well over £1,000 a week in profits, on average. From my experience, you're going to have losing days, maybe once or twice a year a losing week, but after a few losers they **ALWAYS come stomping back into big profits!**

---

**Example:** *Imprimis Tagula* below was 5th in the betting forecast list in the Racingpost with odds quoted at **10/1**. The first opening shows gave *Imprimis Tagula* a price of **5/1**. That's a reduction of 50%. It shortened further into **3/1**, but many are drifting in the last 5 minutes and still running very well. Last few days results below:

## Wednesday

2.06]

### Warwick

**Wolv** 9.20 Bronze Prince 5/2 > 4/6 -73% fav won 4/6 [win 1.91]

**+ 20 points profit**

## **Before Racing Version:**

At around 12.30 to 1pm each day (you can also do this version at around 8am if lunch time is not convenient), open up the Racingpost site, open a meetings racecard and just under the card find the “Show all racecards for this meeting on one page” so you can see all the races for that meeting and the betting forecast prices.

Next open up Betfair and go to the first corresponding race you have in the Racing Post. Look out for a horses SP price (click on the “Betfair Starting Price (SP)” option checkbox on Betfair once logged in) that has/is being backed and has shortened in price from the Racingpost betting forecast.

Again, we want a horse with at least a 40% price reduction from the

Racingpost betting forecast prices.

On average you'll find approx **3 maybe 4 selections each day with an exceptional place strike rate.**

**exceptional place strike rate.**

### **Steamers**

When following the racing live you can also spot a lot of winning and placed

“steamers” – horses that are being backed heavily in the last 5 minutes before the race start. Any horse that has been backed to half its original odds from its first show **can be considered a very**

**strong bet.**

**He's Cool** below on the live shows you can see it was backed to half its original

odds from 20/1 down to 10/1 RESULT Won 10/1:

At The Races All-Weather 20th Anniversary Handicap (Class 6)

your profits each week. This is just an added extra to the main system, but

don't ignore this as it produces good priced winners every week.

Here it is:

Simply have the Racingpost.com site up each day, click on "cards" and

before each race bring up the corresponding race card on the Racingpost.

com web site. To the right hand side you'll find the "Live Reporter" for a

particular meeting where they have someone from the racingpost at the

meeting reporting on market moves, going changes, non-runners as well as

comments from jockeys, owners and trainers.

They also give their own views on certain horses etc. **All we want to watch for is comments from trainers only** for horses in the upcoming races.

IGNORE all jockeys, owners and the live reporters views, trainer comments only. (Trainers will tell the jockeys and owners anything and paint a sunny picture of the horse to give them confidence, so ignore anything from the jockey and owner).

Many trainer comments will be along similar lines such as “I **think** he will run well”, “he’s in good form and I’m **hoping** for a **good** run” forget comments like these. We only want really positive comments where the trainer thinks the horse **WILL** win the race.

Yes there’s a fine line of knowing which ones to back, but after following the

comments for a week or two you’ll know what to ignore and what to back.

Just be patient and wait for the very positive WIN comment, no “hoping”, no “good chance” no “should be in the money”, no each way chance, no “will improve”, better for the run and so on.

Look out for: “**is very very well.**” - “**he has a hell of a chance**” - “We’re hoping for the double for the stable and there is **every confidence behind him**” - “**he’s a winner waiting to happen**” - “**he should win this**” - “I am

expecting **a big run**" (not a "good" run) - "I think she's got a good chance and **I fancy her**" and so on.

Just the "sticking out" comments full of confidence indicates it's expected to win. Many are winning at around the 7/2 - 8/1 etc and many getting placed so your patience will be rewarded handsomely! We're sitting around waiting for the races to come along anyway using the main system so just a quick look for these comments is effortless.

I have a LUMP of money on these selections for a place, quite decent size stake for the win as they really are as good as any info you'll get and the winnings always outweigh the losers. Just be patient and wait for the "outstanding" WIN comments. (*some of these are for the odds on supposed sure thing which I leave alone*).

Also, for a smaller stake, look out for a trainer commenting that the horse is in the sales tomorrow or next week along with the comments of "we're

hoping it will advertise itself” or similar. Yes I know the word “hoping” is there, but a great percentage of these horses have been found the easiest race they can find, dropped down in class etc - to give it it’s best chance for a long time to go for some prize money and “hopefully” get it in the 1st three to attract a better price in the sales. Many of these horses have ran like donkeys for months and go into the race at a big price. A lot of them get placed!

Words are very powerful, I’m not going to get into the subconscious and psychology babble here, but just by learning which particular words they’re using & reading “between the lines” to get the feel of what they mean with their comments, you can make a very good weekly income from this alone if you keep it to yourself and is easily worth many times the price charged for the two systems! Just build up to say £100 win and £200 place and you’ll clear well over £1,000 a week on average with these alone. (from my

experience)

**Examples from the last few days:**

“I’m very hopeful he can win it” – Result: **2nd 6/1**

“He has a hell of a chance” – Result: **Won 11/4**

“A good clean round of jumping will see her in the money” – Result: **Won 6/1**

“He could win this” – Result: **3rd 14/1**

“I think she’s got a chance and I fancy her.” – Result: **2nd 8/1**

## Conclusion:

I hope you've enjoyed reading The Midas Method horse racing strategy and I wish you all the best for your future as a successful backer of horses.

Most importantly, take action on these strategies as they do work like gangbusters.

And remember, bet responsibly.

Any doubts about a selection leave it alone. If you have a loser or two don't panic and begin to chasing your losses and only play with money you are prepared to lose.

Good luck and all the best!

**Steve Gilruth**, *Author*

The Midas Method

**P.S.** Remember to also go through the bonuses I have included with the original Midas Method strategy. The bonuses can be found [here](#).

## **FAQ:**

### **How much should I stake on each bet?**

You can bet whatever you wish starting as low as £5 bets and still make decent returns. If using Betfair we would suggest you split your stake so double is on the place bet (e.g. £10 on a place, £5 on a win). If using other bookmakers, you can simply place an each way bet at your desired amount.

### **How much can I make with this system?**

The sky's the limit. You can make £1000s with this system, but make sure you bet with stakes you are comfortable with and bet responsibly.

### **Will I have losing days?**

Yes almost certainly, but don't worry you'll also have lots of winning days, its important to give this system a good run, as if you stick with it the profitable days will come. If you are a cautious bettor, you can paper trade to learn the system patterns fully. Don't be put off by a few losing days though, as this system bounces back from losses very well.

**I don't have the time to do the live racing version, can I still profit?**

Of course this is why we also do a before racing version, this is ideal for people who have other commitments and want to work the system when they have time free, such as mornings, lunch-time or weekends.

**I'm from the USA and don't have access to Betfair how do I profit?**

USA Players can still profit using Sportsbooks such as [Twinspires](#), here you will be able to bet on UK and IRE racing and be able to access the below websites to find the best bets:

[Racing Post](#)

[Sporting Life Live Shows](#)

**What is the Racing Post Forecast?**

If you go to the [Racing Post](#) and then view the race card for the race you want to bet on, you will see that at the end of the cards is the forecast odds for each horse, this is the racing post forecast. (see example below)
